TDD com Ruby on Rails, RSpec e Capybara

Jackson Pires

Configurando o Rspec no Rails

Rails app

```
rails _5.1.4_ new test_app -T
```

Gem rspec-rails

https://github.com/rspec/rspec-rails

```
group :development, :test do
   gem 'rspec-rails', '~> 3.6'
end

bundle install
```

BD

config/database.yml

```
rails db:create:all
```

Configuração Rspec-Rails

```
rails generate rspec:install
```

.rspec

```
--require spec_helper
--format documentation
```

Rspec binstub

```
group :development do
  gem 'spring-commands-rspec'
end

bundle exec spring binstub rspec
bundle exec spring binstub --all
```

Teste o Rspec!

`bundle exec rspec` **vs** `bin/rspec`

config/application.rb

```
config.generators do |g|
  g.test_framework :rspec,
    fixtures: false,
    view_specs: false,
    helper_specs: false,
    routing_specs: false
end
```
